EDUCATION

AZERBAIJAN STATE OIL AND INDUSTRY UNIVERSITY

Baku, Azerbaijan

B.S., Computer Engineering - GPA: 91.5/100

Sep 2019 - Jun 2023

- Graduated from the Joint *"Collaboration Program to Develop the Bachelors of Emerging Technologies"* between Siegen University (Germany) and ASOIU
- Entrance score: 640/700. Graduation project: Supervised Data Mining Algorithms For Online Education
- **Relevant coursework:** *Artificial Intelligence, Data Structures and Database Systems, Object Oriented Design and Programming, Web Programming and Design*

EXPERIENCE

FERRUM CAPITAL

Baku, Azerbaijan

Front-End Developer

Aug 2023 - Present

- Built and maintained enterprise platform serving 2,000+ partners for contract lifecycle management, factoring, and financial reporting; integrated Asan Imza e-signature for digital contract signing with mass signing capabilities
- Redesigned legacy CRM from scratch; interviewed stakeholders across 4 departments (marketing → loan approval), architected new UX, and wrote API documentation; system now serves 50+ employees
- Developed two React Native mobile apps (150K+ combined users) for factoring and financial processes; implemented SIMA citizen certificate authentication with X.509 parsing and RSA-SHA256 signature verification
- Executed CI/CD pipelines reducing deployment time by 60%

INNOSIGHT LLC

Baku, Azerbaijan

Software Developer

Mar 2024 - Apr 2025

- Built the frontend of an internal office room booking system with a Google Calendar-like UI and an admin panel for employee management using Next.js 14, server actions, React Hook Form, and Zod for server/client validation
- Planned and built a CRM platform for citizen onboarding with integrated video calls and browser/backend-level face detection for identity verification
- Created Swift and Kotlin SDKs enabling face liveness detection; utilized FastAPI backend with Google MediaPipe and authenticated WebSocket connection for real-time active liveness verification

PROJECTS

4YOU [Website](#)

Next.js 15, TypeScript, Server Actions, Zod, shadcn/ui, TailwindCSS, Figma MCP, Docker

- Mental health platform supporting 30+ partner psychologists and 400+ active customers
- Implemented OAuth2 authentication with automatic token refresh and role-based dashboards for patients, psychologists, and companies
- Converted the Figma design system into reusable components using shadcn/ui, Tailwind CSS v4, and Figma MCP to speed up implementation
- Improved accessibility across 10+ user-facing flows using Radix UI, shadcn/ui, and custom fixes for keyboard navigation, focus management, and screen reader support

- Wrote component and integration tests for critical Next.js components and user flows using Jest and React Testing Library, achieving 70%+ coverage in key areas and reducing regressions during development

CodeMark [GitHub Website](#)

React, TypeScript, esbuild, WebAssembly

- Interactive code notebook with live preview (similar to Jupyter/CodeSandbox)
- Browser-based bundling using esbuild-WASM - no server required; achieved ~3ms hot reload performance
- Supports React, markdown cells, and dynamic npm package resolution directly from the browser
- IndexedDB caching layer for offline use and faster subsequent loads
- Monaco Editor integration with 500ms debounce live preview

Ferrum Capital Mobile [App Store](#)

React Native (Expo), Expo Modules, TypeScript, TanStack React Query, React Hook Form, Zod

- Mobile factoring app serving 100,000+ active users
- Organized and implemented full-stack SIMA citizen certificate authentication (frontend + backend) with X.509 certificate parsing, RSA-SHA256 signature verification, and cryptographic challenge-response flow
- Applied multi-module architecture for obligations, factoring, and video-meetings; implemented push notifications via FCM, React Hook Form + Zod validation, and offline capabilities with TanStack React Query caching

LEADERSHIP & ACTIVITIES

"ELACHI" SCHOLARSHIP — *PASHA Holding*

Oct 2022

- Awarded a 1-year scholarship for academic excellence and extra-curricular activities
- Organized and conducted a 1-month Python training program for other scholarship holders

VOLUNTEER — *Formula 1, FIA*

Jun 2022

- Volunteer and supervisor assistant of the BCC; communicated with foreign guests and managed time/zone positions of Crowd Management TM for 3 regions within the city

SKILLS & INTERESTS

Technical: React, Next.js, TypeScript, JavaScript, React Native, Vue, shadcn/ui, Ant Design, TailwindCSS, Radix UI, Zod, Vite, Node.js, Docker, Git, Figma

Languages: Azerbaijani (native), English (C1 - [IELTS 8.0](#)), Russian (A2)

Interests: Hiking, Camping, Brazilian Jiu-Jitsu, Playing Guitar, Reading
